MICROCELL Recoil Pads

- Types: Standard or Leather Effect Texture
- Density: Soft or Extra Soft
- Hole Distance: 80mm or 92mm
- Thickness: 15mm, 23mm, 32mm
- Weight: Varies from 56g to 85g
- Available Colors: Black, Brown, Red
- Microcell is the lightest material on the market for recoil pads.

Please feel free to inquire about any desired product variation you may be interested in – while we have a readily available assortment, we might not always have every item in stock. There may be additional lead times to source required materials from Italy. Bulk discounts may be available.

GRIND TO FIT

MICROCELL® STANDARD TEXTURE

Our traditional Microcell® recoil pads, grind to fit any stocks, available in 2 densities, 3 thickness and with different distance between the holes.

MICROCELL® LEATHER EFFECT

Microcell is the lightest material on the market for recoil pads. Its outstanding recoil absorption guarantees the best comfort.

Disclaimer: Many variants of Standard & Leather Effect Texture are already available on our website. This page is meant to show all available options that can be customized to your needs.

SLOPING HEAD MICROCELL®

Maximum grip reduction due to its silky texture and sloping head, for the easiest shouldering.

SMOOTH MICROCELL®

Suitable for smaller stocks. Extra soft density. With centering pins on the rear side.

CURVED MICROCELL®

Ergonomic shape to guarantee great stability during the shot.

TRAP MICROCELL®

Ergonomic shape to guarantee great stability during the shot.

FLAT MICROCELL®

The extra 1 mm on the outline facilitates the grinding.
